**PUBLIC SELECTION PROCEDURE FOR THE RECRUITMENT OF NO. 1 RESEARCHER WITH A FIXED TERM CONTRACT AT THE UNIVERSITY OF BERGAMO PURSUANT TO ART. 24, PARAGRAPH 3, SUBPARAGRAPH A) OF LAW NO. 240 OF 30.12.2010.**

### **Article 1 Contest type**

The following public selection is announced by procedure of comparative assessment for the recruitment of no. 1 fixed term Researcher for a period of 36 months, pursuant to art. 24, paragraph 3 subparagraph a) of the Law no. 240 of 30.12.2010 and to the University's rules and regulations on the matter, as specified below:

**REFERENCE STRUCTURE AND PLACE OF CONDUCT OF ACTIVITIES - DEPARTMENT OF LETTERS AND PHILOSOPHY - OF BERGAMO (BG)**

**Macro contest sector:** 10/H - French studies

**Contest sector:** 10/H1 - French language literature and culture

**Scientific-disciplinary sector:** L-LIN/03 - French literature

**Research program:** Based on examinations of literary and scientific documents related mostly (but not exclusively) to the eighteenth century, the three-years research program intends to reconstruct the European framework of scientific culture - and especially its French dimension and in its relations to medicine - in an effort to identify the influences of specialized languages in literature.

At the beginning of the eighteenth century, the "vapeurs" phenomenon (and its pertaining terminology) spread swiftly throughout Europe, as documented in a myriad of medical treatises competing with one another, in order to conjure up an imaginary disease that involved large sections of the population and became the latest fashion. The purpose of the physicians' corporation was obviously to become richer, but also to exercise some sort of control over the upper classes as they were the only ones able to benefit progressively from "care", especially in the first trendy "spa-resorts". It is important, for the purpose, to carry out a linguistic survey to highlight the influence of the spread of a specialized technical language in the context of novels, and in literature at large. Later, this phenomenon, predominantly focusing on nerves and neurological pathologies, was to undergo another deeper metamorphosis that arose as the obvious continuation of this investigation, along with mesmerism at the turn of the eighteenth century, with hysteria in the formulations put forward by Charcot in his various experimentations, and with the physiognomic theories from Lavater to Lombroso's re-interpretations.

The scope of the investigation necessitates at least three years and possibly an additional two years. The intent is to cover a knowledge area hitherto little explored but exceedingly fruitful.

**Educational activities provided for in the contract, including integrative and of service to students and characteristics of the research activities:** The annual workload for the carrying out of the activities involved in official teaching and supplementary teaching, also addressed to the tasks of the European PhD EMJD "Interzones" currently operative at the University of Bergamo, is equal to 120 hours, while the remaining n. 230 h will support the activities of service to students and doctoral students. The educational activities of the candidates in the field of international doctorates will be assessed by the Commission. The teaching and educational activities will be approved by the Department while the academic year teaching plan is discussed.
