
APPLIED HEALTH ECONOMETRICS AND HEALTH POLICY - AHEHP

Summer School

July, 17th – 21st 2017

Bergamo, Italy

Partnership

Università degli Studi di Bergamo

Crisp – Università degli Studi di Milano Bicocca

- AHEHP is focused on
 - Organization of health care
 - Health econometrics
- Health Care is more and more important
 - 10% of world GDP (World Bank, 2014); 9% Italy; 17% US
 - Forecasts: increasing expenditure for ageing population
- Health Econometrics plays an important role in supporting health and social care policy programs.
- The Summer School in AHEHP aims to bring together graduate students and Ph.D. students with no background in Health Economics and Policy to get involved in the main healthcare problems.

- Università degli Studi di Bergamo,
- Department of Management, Information and Production Engineering
- Viale Marconi, 5 Dalmine, Italy
- Room: B104

- Graduate students (Master students)
- PhD students with no background in Health Economics

- Graduate students attending the Summer School will get 6 ECTS credits counting for their degree Master in Management Engineering, Università degli Studi di Bergamo.
- Students of other Universities or attending other programs will get a certificate that the School accounts for 6 ECTS credits.
- The School has 7 hours lectures and Econometric labs per day (5 days), and 20 hours of individual homework.
