di Scienze Umane  
e Sociali

*Master's Degree  
Clinical Psychology for Individuals, Families and Organizations*

**SIX FRIDAYS FOR THE PROFESSIONAL FUTURE**  
Curricular Traineeship Workshops

*All second year MD students are called to the following workshops that will be held by professional experts of psychological intervention in the main contexts of clinical practice: private practice, public services, communities and non-profit organizations, productive organizations, and educational institutions. A final workshop will focus on ethical and deontological aspects of psychological practice. All the workshops are an opportunity to orient students on potential intervention of the clinical psychologist as an expert in creating - within each specific context - relationships that activate reflective processes, meaningful changes and wellbeing. The clinical psychologist's possible positions will emerge from practical examples and experiences that students will confront with. The internship projects in the host organizations will also be presented to the students.*
