

**Research program:**  
***“Analysis of symbolic representations of collaborative practice within the palliative care networks of Bergamo”***

***Annex Code 5***

**Department of Human and Social Sciences**

**Tutor:** Prof. Stefano Tomelleri

**Research subject:**

The research project will investigate the main forms of interprofessional collaboration within the network of palliative care of Bergamo through the analysis of interactive symbolic representations among the nodes social (professional and otherwise) involved in the paths of terminal illness and analgesia.

**Research structure:**

The research provides a qualitative study carried out through collective interviews with health and social professionals, documental analysis of guidelines and operational procedures involved in the services and the use of qualitative network analysis.
