

Research program:
“Definition of the requirements and specifications for the development of the PSS design support SW for the DIVERSITY collaborative engineering environmen”

Annex C

Department of Department of Management Engineering, information and production

Tutor: Prof.ssa Giuditta Pezzotta

Description

The research will be structured in the following phases.

- Analysis of the industrial requirements for the definition of the PSS design support SW: Interviews will be carried out in CAREL to collect these requirements
- Definition of the SW specifications useful for the early and full prototyping of the PSS design support SW
- Test and implementation of the SWs developed by the IT partners in Carel.
