

Research program:
“Assessment of the value of technological research results, technology transfer and entrepreneurship”

Annex C

GITT - Centre on Innovation Management and Technology Transfer
Tutor: Prof. Sergio Cavalieri

Research project

The research programme, carried out in collaboration with the Research and Technology Transfer Office, focuses on the promotion, valorisation and commercialisation of academic research results through an evaluation of the economic potential of research results and an evaluation of its industrial deployment. The programme will encompass benchmarking activities, creation of guidelines, definition of operational practises, through analysis of new technologies and their deployment, definition of models of technology transfer, an analysis of literature about models of technology transfer.

In addition, a specific research stream within the program will be devoted to the development of models of international cooperation in order to create technology transfer structures with industrial and scientific partners of other countries.
