WORK EXPERIENCE

1 Oct 2018–Present

Fixed-term researcher

Università degli Studi di Bergamo
viale Marconi, 5, 24044 Dalmine (Italy)
<http://www.unibg.it>

Fixed-term researcher (B-type) in Fluid dynamics (SSD ING-IND/06) at
Dipartimento di Ingegneria e scienze applicate, Università degli Studi di Bergamo
[Ricercatore a tempo determinato (tipo B)].

1 Oct 2015–30 Sep 2018

Fixed-term researcher

Università degli Studi di Bergamo
viale Marconi, 5, 24044 Dalmine (Italy)
<http://www.unibg.it>

Fixed-term researcher (A-type) in Fluid dynamics (SSD ING-IND/06) at
Dipartimento di Ingegneria e scienze applicate, Università degli Studi di Bergamo
[Ricercatore a tempo determinato (tipo A)].

Involved in the EU Horizon 2020 project TILDA (Towards Industrial LES/DNS in
Aeronautics - Paving the Way for Future Accurate CFD)
(http://cordis.europa.eu/project/rcn/193362_en.html) grant agreement No.635962.

23 May 2016–22 Sep 2016

Research collaboration

Università degli Studi di Brescia
<http://www.unibs.it/>

“Implementation of an *h*-multigrid solution strategy based on agglomeration in an
incompressible solver for medical flows \ Implementazione di una strategia risolutiva di tipo
h-multigrid basata sull’agglomerazione in un solutore incomprimibile per flussi medicali”

Work done within the research activity with Medtronic (<http://www.medtronic.com>): “Study
of splanchnic perfusion as assessed by Computational Fluid Dynamics (CFD) in
thoracoabdominal aneurysms treated by hybrid procedures”.

Scientific advisor: Prof. Stefano Bonardelli.

1 Dec 2014–31 Jan 2015

Research collaboration

Università Politecnica delle Marche
via Brecce Bianche, 60131 Ancona (Italy)

Development of my Master Thesis work titled: "Investigation into the Decoupling of Mean-

Curriculum vitae

flow and Turbulence-Model Relaxation for a Finite-Volume Discretization of the RANS Equations".

Supervisor: Prof. Francesco Bassi

Co-Supervisor: Dr. Richard P. Dwight

The work concerns improvements to the steady-state efficiency of the unstructured finite volume solver the DLR Tau-Code. In particular the decoupling of mean-flow and turbulence equations was investigated. An extensive analytical study precedes and supports the computational approach used in the systematic investigation of the decoupled solver. The work performed may be considered as an overview on the treatment of the turbulence model, providing a deep insight into the temporal evolution.

EDUCATION AND TRAINING

1 Jan 2008–21 Apr 2011

Ph.D.

Università degli Studi di Bergamo, Dalmine (BG) (Italy)

Ph.D. in "Technology for energy and environment technology"

Ph.D. Thesis title: "An agglomeration based discontinuous Galerkin method for compressible flows"

This work aims to deeply assess the potential of the Discontinuous Galerkin method on general meshes, polygons in 2D. The ability to deal with arbitrary elements is the key feature to simply perform a non-standard approach to the adaptive mesh refinement where agglomeration coarsening allows to locally adapt the resolution of the mesh. The mesh becomes a degree of freedom of the computation where the nodes connectivity is determined on the fly giving a great geometrical flexibility to the proposed implementation.

The work considers the Discontinuous Galerkin discretization of simple model problems as well as the compressible Navier-Stokes and RANS + k- ω turbulence model equations.

equations, ECFD VI, July 20-25, 2014, Barcelona, Spain

F. Bassi, L. Botti, A. Colombo, N. Franchina, F.C. Massa, A. Ghidoni, S. Rebay, An implicit
high-order Discontinuous Galerkin solver for hybrid RANS-LES simulations, SIMAI 2014,
[MS10] Numerical methods for coupled problems July 7-10, 2014, Taormina, Italy

A. Ghidoni, D. Pasquale, S. Rebay, A. Colombo, F. Bassi, p-multigrid Discontinuous
Galerkin method for compressible turbulent flows. 51st AIAA Aerospace Sciences Meeting
including the New Horizons Forum and Aerospace Exposition 2013, 7-10 January 2013,
Grapevine, TX, USA

F. Bassi, L. Botti, A. Colombo, DG discretization on agglomerated meshes for CFD.
Workshop on Polygonal and Polyhedral meshes, 17-19 September, 2012, Università di
Milano Bicocca

F. Bassi, L. Botti, A. Colombo, C. De Bartolo, Implicit High-order Discontinuous Galerkin
solution of Turbulent Flows with an Explicit Algebraic Reynolds Stress Model. European
Congress on Computational Methods in Applied Sciences and Engineering (ECCOMAS
2012), 10-14 September 2012, Vienna

F. Bassi, L. Botti, A. Colombo, Agglomeration-Based Physical Frame dG Discretizations for
High-Order Accurate CFD. European Congress on Computational Methods in Applied
Sciences and Engineering (ECCOMAS 2012), 10-14 September 2012, Vienna

F. Bassi, L. Botti, A. Colombo, A. Ghidoni, S. Rebay, Implementation of an Explicit
Algebraic Reynolds Stress Model in an implicit high-order Discontinuous Galerkin Solver.
International Conference on Spectral and High Order Methods (ICOSAHOM 2012), June 25-
29, 2012. Gammarth, Tunisia

F. Bassi, L. Botti, A. Colombo, A. Ghidoni, S. Rebay, Investigation of near-wall grid spacing
effect in high-order Discontinuous Galerkin RANS computations of Turbomachinery Flows.
International Conference on Spectral and High Order Methods (ICOSAHOM 2012), June 25-
29, 2012. Gammarth, Tunisia

F. Bassi, L. Botti, A. Colombo, A. Ghidoni, S. Rebay, An Implicit Agglomeration-Based
Discontinuous Galerkin Method for Compressible Flows. ADMOS 2011 International
Conference on Adaptive Modeling and Simulation, France, Paris 6-8 June, 2011

F. Bassi, L. Botti, A. Colombo, A. Ghidoni, S. Rebay, High-order accurate p-multigrid
discontinuous Galerkin method for aerospace applications. 16th International Conference on
Finite Elements in Flow Problems (FEF 2011), Germany, Munich, March 23 -25, 2011

F. Bassi, L. Botti, A. Colombo, A. Ghidoni, S. Rebay, An h -adaptive discontinuous Galerkin
method based on element agglomeration. 16th International Conference on Finite Elements in

Curriculum vitae

Flow Problems (FEF 2011), Germany, Munich, March 23 -25, 2011

F. Bassi, L. Botti, A. Colombo, N. Franchina, A. Ghidoni, S. Rebay, A high-order accurate discontinuous Galerkin method for turbomachinery applications. 9th European Conference on Turbomachinery Fluid Dynamics and Thermodynamics (ETC 9), 21-25 March 2011, Istanbul, Turkey

F. Bassi, A. Colombo, N. Franchina, A. Ghidoni, S. Rebay, High-order accurate p-multigrid discontinuous Galerkin solution of the RANS and $k-\omega$ turbulence model equations. V European Conference on Computational Fluid Dynamics (ECCOMAS CFD 2010), 14-17 June 2010, Lisbon

Computer skills	Competent in CFD solvers (StarCCM+, OpenFOAM, Fluent) and Tecplot and Paraview visualization software. Competent in Fortran, C, Python, MATLAB languages. Competent in parallel programming (MPI).
