

**Andrea Belleri**  
Curriculum vitæ

Department of Engineering and Applied Sciences  
University of Bergamo  
Viale Marconi 5, 24044 Dalmine, Italy

phone: 035 2052 007  
email: andrea.belleri (at) unibg.it  
webpage: <https://sites.google.com/a/unibg.it/abelleri/>

## CURRENT POSITION

**University of Bergamo**  
Associate professor (Scientific sector ICAR09 – Structures) 11/2019 – present

## PREVIOUS RESEARCH POSITIONS

**University of Bergamo - Italy**  
Assistant professor (RTD-B) (Scientific sector ICAR09 – Structures) 11/2016 – 11/2019  
Assistant professor (RTD-A) (Scientific sector ICAR09 – Structures) 09/2014 – 11/2016  
Research grant holder - Research program: “Definition of seismic resistant structural systems for precast structures and development of design and vulnerability assessment methods” 08/2010 – 07/2013  
Research grant holder - Research program: “Development of displacement based approaches for the seismic design of precast structures”. 08/2008 – 07/2009

Research grant holder - Research program: “Development of displacement based approaches for the seismic design of precast structures”. 07/2006 – 07/2008

**EUCENTRE (European Centre for Training and Research in Earthquake Engineering), Pavia, Italy**

Research collaborator - Research program: “Definition and development of advanced seismic protection strategies for precast concrete multi-story structures”. 09/2009 – 07/2010

## EDUCATION

**PhD in Structural Engineering**, “Modeling, Preservation and Control of Material and Structures”, University of Trento, Italy 03/2009  
**Laurea in Civil Engineering**, summa cum laude, University of Brescia, 10/2004

## VISITING POSITIONS

**Tufts University, Boston**  
Visiting Assistant Professor, School of Engineering 07/2017  
**Tufts University, Boston**  
Visiting Fellow, School of Engineering 05/2012 – 07/2012

<b>University of California, San Diego (USA)</b>	Visiting Ph.D. student, School of Engineering	08/2006 – 06/2008
<b>Heriot-Watt University, Edinburgh (UK)</b>	Visiting student, School of Engineering	09/2001 – 06/2002

## TEACHING EXPERIENCE

<b>Undergraduate Course</b>		
Structural design principles	a.y. 2019-2020	
Reinforced Concrete Structures	a.y. 2019-2020	
Steel Constructions	a.y. 2014/2015 – present	
Structures A (6CFU)	a.y. 2009/2010 – 2012/2013	
<b>Graduate Course</b>		
Fundamentals of Displacement Based Design	a.y. 2016/2017	
	a.y. 2017/2018	
Advanced Precast Structural Systems	a.y. 2018/2019	
<b>Advisor</b> of 24 undergraduate dissertations	a.y. 2009/2010 – present	

## OTHER WORK/RESEARCH EXPERIENCES

Chartered engineer	2005 - present
Member and Co-Founder of Di.Mo.Re. srl, academic spin-off of University of Bergamo, active in diagnostic, monitoring and retrofit of buildings and structures.	2012 - present
Collaboration in several experimental activities at the Structure/Material Test Laboratory of the University of Bergamo in the fields of research, assessment and mechanical characterization of structural systems and their components. Specific contributions: experiment design, testing, data post-processing and interpretation.	2007 - present
About 61 hours of lectures for professional engineers on the seismic design, finite element modeling, vulnerability assessment and retrofit of one-story and multi-story precast concrete structures	

## HONOURS AND AWARDS

<b>Winner</b> of the Research and University category of the PEER Blind Prediction Contest 2017	2018
Pacific Earthquake Engineering Research Center, Berkeley, USA	
<b>Key scientific article</b> for the article "Displacement based design for precast concrete frames with non-emulative connections". Advances in Engineering	2017
<b>Silver International Green Apple Award</b> for The Built Environment & Architectural Heritage 2016	
The Green Organization, UK	2016
<b>Inventor</b> of the Italian patent 0001414593: "Increased dissipation/stiffness system with displacement amplification". International class E04H. Application number GE2012A000108, released on 26/03/2015	
<b>Co-author of 2 invited papers</b> in the international workshop "SAFESUST: A roadmap for the improvement of earthquake resistance and eco-efficiency of existing buildings and cities", at Joint Research Centre (Ispra, Italy)	11/2015
<b>Co-author of 2 invited papers</b> in the international workshop "SURECON - A roadmap for a SUstainable integrated REtrofit of CONcrete buildings under accidental loads", at Joint Research Centre (Ispra, Italy)	10/2018
<b>Co-author of 1 keynote paper</b> in the international conference "CINPAR 2018 Conference, XIV International Conference on Building Pathology and Constructions Repair", Florence, Italy	06/2018
Member of the <b>scientific committee</b> : "3rd FRC International Workshop (2nd ACI- fib Joint Workshop) Fibre Reinforced Concrete: from Design to Structural Applications". Desenzano,	28-30/06/2018
Member of the <b>organizing committee</b> : Workshop ACI Italy Chapter "Connections in Precast Structures". Bergamo,	05/10/2012
<b>Invited keynote speaker</b> : "Research, Design and Construction of Precast Floor Systems in Italy". "1st International Symposium of Precast Slab Systems in seismic zones and their connections". Veracruz, Mexico,	05/2011

<b>Martin P. Korn Award 2009</b>	Precast/Prestress Concrete Institute (PCI)	2009
<b>George D. Nasser Award 2009</b>	Precast/Prestress Concrete Institute (PCI)	2009

## RESEARCH FIELDS

The research interests regard structural engineering and in particular performance seismic design and assessment methodologies based on structural displacements control (Displacement Based Design). Other topics are the theoretical and experimental research on civil construction typologies and technological components in precast industry, both for structural and non-structural elements, focusing on the study and development of dissipating and re-centering devices/structural elements and on the relative design procedures definition. It is also of interest the seismic vulnerability evaluation of existing buildings, the development of retrofit solutions and the dynamic identification and structural health monitoring of structural systems. Latest interests regard the rehabilitation of existing RC buildings under multi-criteria approaches (life cycle thinking).
