Academic recruitment field: 10/L1 - English and Anglo-American languages, literatures and cultures;

academic discipline: L-LIN/12 - Language and translation - English;

Research program:

Nowadays, especially at an international level, manuscript resources made available in digital format appear to be eliciting a growing interest; for this reason, this research project intends to focus, in the context of the history of the English language, on specific materials dating from the 18th century to the first half of the 20th century. The goal is to outline investigation paths which, drawing on the methodologies of the so-called Digital Humanities and corpus linguistics, allow us to analyze pragmatic and sociolinguistic phenomena of English in a diachronic framework. More specifically, the proposed project intends to improve the positioning of the University of Bergamo in the context of international research through publications and conference presentations on topics whose scientific potential, although certain, has not yet been explored in full; among these we find (for example) private papers drawn up in less frequently-studied geographical and / or social varieties that are not included in the corpora that are in common use. The project therefore aims to explore these resources and relate them to state-of-the-art studies in the field of historical pragmatics and sociolinguistics, in order to expand their results. Specific fields of investigation will be: a) the relationship between Digital Humanities and corpus linguistics; b) historical pragmatics and historical sociolinguistics of the English language; c) ego and archival documents.

The candidate's previous research activity is required to be relevant to the themes of the project, especially in relation to archival document studies, not least at an international level; previous experience (in Italy or abroad) teaching the English language and doing research in the context of the history of the English language will also be considered.
