

Master's Degree in Clinical Psychology for Individuals, Families and Organizations

Widening the scope of clinical psychological intervention

Seven Curricular Traineeship Workshops

Seven workshops will be held by professional experts of psychological intervention in the main contexts of clinical practice: private practice, public institutions, communities and non-profit organizations, business companies, and educational institutions. An additional workshop will focus on ethical and deontological aspects of psychological practice.

The workshops are an opportunity to orient students on potential intervention of the clinical psychologist as an expert in creating – within each specific context – relationships that activate reflective processes, meaningful changes and wellbeing. The clinical psychologist's possible positions will emerge from practical examples and experiences that students will confront with.

The internship projects in some host organizations will also be presented to the students during the workshops.
